

CS 1010 Group Work Guidelines

1. Encourage respectful and constructive communication among group members
2. Listen to all group members, each person's thoughts have value
3. Participate in the project by distributing tasks among team members and proactively engaging with those who may be less involved
4. Ensure that communication is inclusive and accessible to all
5. Speak up when you observe any form of inequity; do not condone situations where one person monopolizes discussions or roles are assigned based on assumptions

Ex. No one person should dominate a conversation
